Neobatrachus sudelli

Spotted Burrowing Frog

Photo: G. Marantelli, www.frogs.org.au

Neobatrachus sudelli was not recorded at any Frogwatch sites in 2006. This species spends much of its time burrowed underground, and only comes out during periods of rain. The extremely dry conditions experienced in October 2006 explain the absence of *N. sudelli* from the Frogwatch Census this year.
